3rd place - SCC 2023

Language

English (spoken and written)

Serbian (native)

Socials :

LinkedIn   GitHub   Website

Experience

Moonstruck | Belgrade, Serbia | *Part-time*

Dec 2022 - present

Junior Developer

Engaged in multiple projects as a backend and smart contract developer, focusing on developing NFT and soulbound tokens, Proof of Attendance Protocol (POAP) certificates and contributing to the Bitcoin Runes project. Additionally, played a role in projects involving the NEAR, SUI and Internet Computer (ICP) chains.

Mentor

Mentored a group of interns creating an educational web platform for Web 2.5 Academy. Held JavaScript introduction lessons at Web 2.5 Academy, a course organized by Moonstruck, Serbia Innovates, and USAID.

Jun 2022 - Nov 2022

Intern

Learned about smart contract development, as well as various fungible and non-fungible token standards. For my final project, I collaborated with the development team to design and implement an Ethereum Name Service (ENS)-like system.

Petnica Science Center | Petnica, Serbia

Jan 2021 - Dec 2022

Computer Science Student

Engaged in a collaborative machine learning calculator project and pursued an individual research initiative applying Neural Networks for video game cheating detection, while acquiring proficiency in diverse computer science domains.

Business Incubator | Majdanpek, Serbia

Dec 2021 - Jun 2022

Python Camp Assistant

Assisted in the "Python Camp", guiding students in the creation of a web quiz app.

Projects

BG++ (BGPP)

Reverse engineered the original closed-source application and developed my own free and open-source, user-friendly web application, providing real-time public transport information for Belgrade, Novi Sad, and Nis.
